CULTURAL SENSITIVITY STATEMENT

It is a condition of use of this finding aid, and of the collection described in it, that users ensure that any use of the information contained in it is sympathetic to the views and sensitivities of relevant Aboriginal and Torres Strait Islander peoples. This includes:

Language

Users are warned that this finding aid may contain words and descriptions which may be culturally sensitive and which might not normally be used in certain public or community contexts. Terms and descriptions which reflect the author's attitude, or that of the period in which the manuscript was written, and which may be considered inappropriate today in some circumstances, may also be used.

Deceased persons

Users of this finding aid should be aware that, in some Aboriginal and Torres Strait Islander Communities, seeing images of Deceased persons in photographs, film and books or hearing them in Recordings etc. may cause sadness or distress and, in some cases, offend against strongly held cultural prohibitions.

COLLECTION OVERVIEW

Scope and content note

This collection comprises two parts, A and B. Part A contains the data and drafts of some of Abbie's publications; correspondence and reference material related to their production. Published versions of Abbie's articles were only occasionally included in these papers and can be sourced elsewhere, in the AIATSIS Collection or other institutions collections. Documents in this collection are holographs, typescripts, carbons and photocopies of typescripts.

Part B is an extensive collection of conference papers, journal articles and press clippings on a wide range of subjects relating to physical anthropology, compiled by Abbie. It is further divided, into two parts: Aboriginal material and non-Aboriginal material. They are in original, mimeograph, photocopy, pamphlet and offprint form.

Provenance

This collection was deposited with AIATSIS on 12 October 1988.

Material separated from collection

No material has been separated from the collection.

Related Material

BIOGRAPHICAL NOTE

Most of the following information is taken from R. Elmslie and S. Nance, 'Abbie, Andrew Arthur, 1905-1976', *Australian Dictionary of Biography*, National Centre of Biography, Australian National University, <http://adb.anu.edu.au/biography/abbie-andrew-arthur-9300>, first published 1993, accessed online 28 January 2016.

MS 65 AA Abbie, Papers, 1892-1976

Andrew Arthur Abbie (1905-1976), Anatomist and anthropologist ... was born on 8 February 1905 at Gillingham, Kent, England, only son and eldest child of William Christie Abbie, engine-room artificer, and his wife Minnie Catherine, née Baylis. Educated at Sir Joseph Williamson's Mathematical School, Rochester, he held a Kent County scholarship and matriculated at the University of London in 1922. The family migrated to New South Wales and in 1924 Andrew enrolled at the University of Sydney (B.Sc., M.B, B.S., 1929) where he won several prizes and graduated with second-class honours. In 1932 Abbie took up a Walter and Eliza Hall travelling fellowship, enabling him to work at University College, London, where he completed a PhD in 1934. In 1935 Abbie became senior lecturer in anatomy at the University of Sydney. The University awarded him an M.D. in 1936 and, for two papers published in the *Journal of Comparative Neurology*, a D.Sc. in 1941.

In 1950 Abbie wrote his first paper on the anatomical features of the Australian Aborigines. Thereafter he concentrated on gathering information about the social and physical characteristics of these people for whom he had high regard. In 1951-64 his department mounted expeditions to Aboriginal communities in South Australia and the Northern Territory. Abbie and his colleagues collected anthropomorphic data which formed the basis of his book, *The Original Australians* (1969). It was a personal account for the general reader and quickly ran to a second edition. He retired from the university in 1970.

Abbie had been president of the Anthropological Society of South Australia (1948 and 1959) and of the anthropological section of the Australian and New Zealand Association for the Advancement of Science (1951). In 1963-72 he was chairman of the South Australian Board of Aboriginal Affairs. His concern for integration led him to propose two scholarships for Aborigines at Presbyterian Girls' College, Adelaide, where he chaired (1951-66) the council. He was a foundation and life member of the Anatomical Society of Australia and New Zealand (acting-president 1964; president 1965-67), and was, as well, a life member (1971) of the Anatomical Society of Great Britain and Ireland. During his academic career Abbie published over 120 papers, mostly as sole author. He died on 22 July 1976.
