Abstract: This volume explores how linguistic theories inform the ways in which languages are described. Theories, as representations of linguistic categories, guide the field linguist to look for various phenomena without presupposing their necessary existence and provide the tools to account for various sets of data across different languages. A goal of linguistic description is to represent the full range of language structures for any given language. The chapters in this book cover various sub-disciplines of linguistics including phonetics, phonology, morphology, syntax, semantics, language acquisition, and anthropological linguistics, drawing upon theoretical approaches such as prosodic Phonology, Enhancement theory, Distributed Morphology, Minimalist syntax, Lexical Functional Grammar, and Kinship theory. The languages described in this book include Australian languages (Pama-Nyungan and non-Pama-Nyungan), Romance languages as well as English. This volume will be of interest to researchers in both descriptive and theoretical linguistics.

Annotation: "The artists of the Injalak Arts and Crafts Association, together with the people of Gunbalanya (Oenpelli), are proud to introduce Kunwinjku art from Injalak, 1991-1992 : the John W. Kluge commission. This collection comprises forty five paintings that depict important Dreamings that are of great significance to the Kunwinjku people. Working on this commission was a unique opportunity for the artists and elders of Gunbalanya to collaborate on a comprehensive and multi-faceted project. It is the first time that we have worked together in such a way, and the results have been very satisfying."--Page 10.
Annotation: Examines the art of the Gunbalunya area of Western Arnhem Land, its overriding importance to the people, and records how 15 artists from the region created a collection of 45 paintings to record their culture and stories.
