

TO angles not yet met by the current northern development agenda?

- Indigenous advisory committee from across Northern Australia (esp Qld) to represent TO interests of the regional development
- PBCs receiving fee for service for engagement
- Banks to loan moneys to allow growth of industry for the benefit of our mob, the region and nation as a whole

- Collaboration and joint partnership between PBC groups giving opportunities to PBC groups living in isolation / remote communities
- Obtain TO collaboration across states to adjust statutory planning systems to proactively enable and assist Aboriginal enterprise and Aboriginal self development eg new Qld Planning Act provisions to be tied to northern development with designed Aboriginal engagement
- Recognition of native title land tenure
- Use ILUAs to develop, renegotiate and review and use ILUAs for new indigenous land use

- Renewable energy sources, tidal flow, sun
- Renewables Commission as alternative economic development to mining
- Water rights, resources and regrowth for 17 to 30 year vision
- Tourism opportunities
- National parks - need for full management by TOs
- Innovation
- Innovation funding for emerging indigenous industries - ecosystem services, carbon industry

- CRC - how do PBCs engage in the securing access to funding for research?
- Want to know more about the \$20.4m. Where is the \$20.4 m? Need that 20.4 million to be made available to PBC for economic business planning can do. Re-identify for pro Aboriginal development

- Discuss with Luke Barwon ex ILC, now NT Cattlemen's Association, and or Office of Northern Australia
- Implement recommendations from Indigenous working group (chaired by Wayne Bergman?) regarding Indigenous economic development and land tenure reform
- If project is ready, why do you have to wait for funds?
- Not easy for TOs to get into business development because the programs and NAS is tailored for business

What would need to change if there is a second generation Northern Australia White Paper?

- Change the name "White Paper"
- Needs black input, it'd be a different feel
- Youth ownership trained to take over own business
- Genuine recognition about Aboriginal and Torres Strait Islander ownership
- Genuine inclusion in negotiations
- All PBC's to be engaged in person; White paper to be discussed with all PBC's
- The TO landholders
- Better access to the funding that is actually available (eg the NTDevfund - only a small position been released - plus too much of it allocated to Adani!
- Implement recommended amendments to NTA (law reform and COAG)
- Long term (3-5 years) funding support to PBCs that includes the resources for staff and assets
- Commitments to Indigenous ownership and employment in development projects supported by training at the front end of project development
- How do TOs access info?

Is there an appetite for a conversation across the northern Australia to leadership around these issues?

- Yes
